

# Hello from PriMED Physicians!

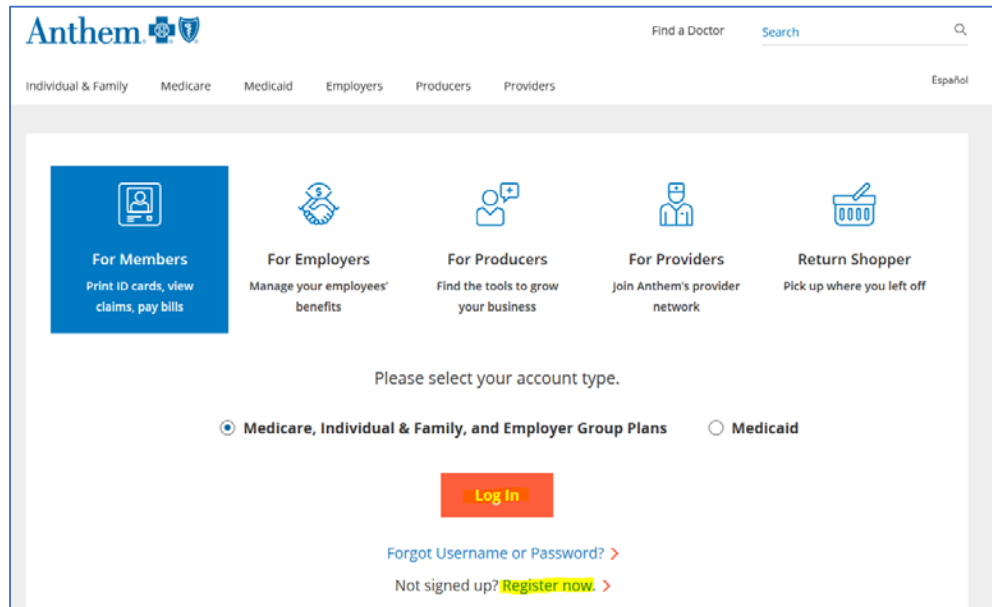

Thank you for being a patient of PriMED. It's important Anthem has accurate information about you and your PriMED primary care physician.

Does your Anthem Member ID card show your current doctor's name? If not, please **update Anthem** with this information.

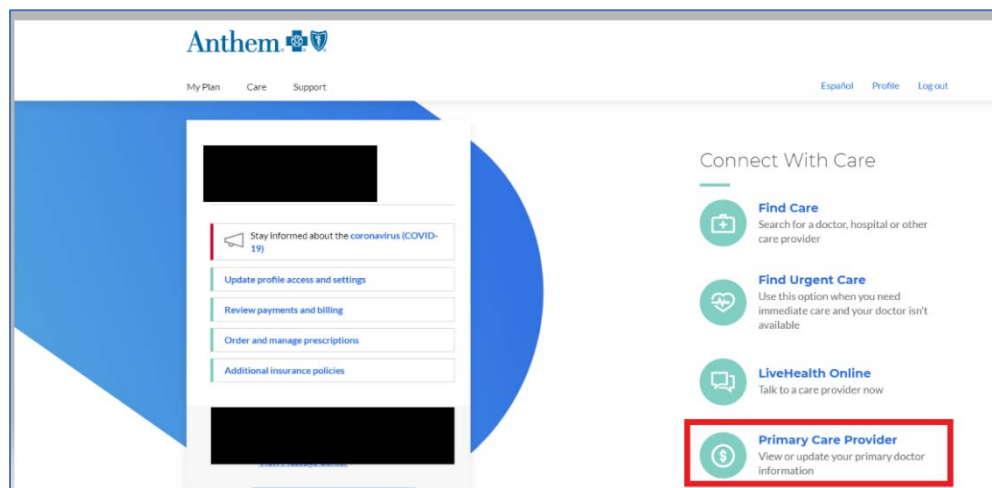

To update Anthem on your primary care physician, follow these three steps:

**Step One:** Go to [Anthem.com/account-login/](https://Anthem.com/account-login/)

Login or register with your Anthem member ID found on your ID card.

**Step Two:** Once logged in, please see red boxed section below to select your PCP.

**Step Three:** You can search for your PCP either through a zip code search or doctor name search.

If your PCP is not found, you can select another doctor from the same office location. The office location will be sent information to better coordinate your care for your PCP to utilize.
