

We're pleased to announce our affiliation with  
Dayton Children's Hospital.

# We're building the future

We'll continue to provide  
exceptional primary care that  
families know and love.

Every day, our office works closely with Dayton Children's, and now, we've strengthened this partnership. PriMED continues to be an independent medical group. This agreement does not apply to family practice.

Our goal is to make it easier to access pediatric services, with better continuity of care, including integration of technology and digital resources with Dayton Children's.
